## **PETITION TO ADD RESTRICTED PRODUCTS**

On May 15<sup>th</sup>, 2010 the Washington State Liquor Control Board recognized the City of Spokane's request for a mandatory Downtown Alcohol Impact Area, the City's first AIA. On September 15<sup>th</sup>, 2012 the Board recognized the East Sprague AIA, Spokane's second Alcohol Impact Area. The requested banned products lists for each AIA was compiled by observation of products being sold by licensees within the respective AIA's and of which the empty containers of fortified beer products were found cluttering the streets, sidewalks and business entryways demonstrating product use by the local chronic inebriate.

Since implementation of these Alcohol Impact Areas, beer manufacturers have created new labels and are encouraging our local distributors to push these products on licensees located within the AIA's. We have received complaints from businesses and patrol officers who are seeing an increase in the use of these new labels by the chronic inebriates.

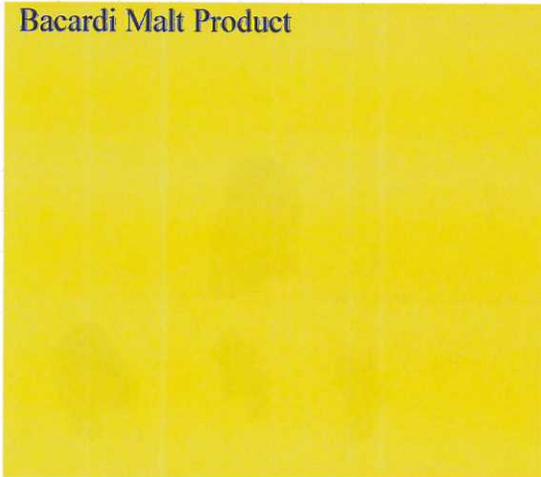

In accordance with WSR 10-19-065 which went into effect on October 16<sup>th</sup>, 2010, the City of Spokane and the Spokane Police Department requests the Washington State Liquor Control Board recognize the following products as significantly and materially the same in size, content, alcohol percent and price as those products currently listed on our Banned Product list. The following products are sold in similar container sizes and have a minimum alcohol content of 5.7 percent by volume.

The following products are currently being distributed to licensees within the Spokane Downtown Alcohol Impact Area and the East Sprague AIA and are being purchased by our local CPI's:

### **Bacardi +**

Bacardi Malt Product

8%

**RECEIVED**
