

**Washington State
Liquor and Cannabis Board**

**Vapor Product Retail and Wholesale
Bulletin No 16-04 Updated**

Date: September 30, 2016
To: Vapor Product Industry Members
From: Deputy Chief Steven D. Johnson
Subject: Enforcement of Licensing Issues

RCW 70.345.020 establishes the types of licenses and the application process and RCW 70.345.030 requires a license to “engage in or conduct business as a retailer, distributor, or delivery seller in this state...” Due to challenges associated with completing the license application process and the large number of applicants, the WSLCB has determined that the community and industry needs are best served if enforcement actions are delayed.

In an effort to support industry needs, the WSLCB will delay enforcement actions against retail and wholesale vapor product applicants actively working to secure a license until November 1, 2016.

Every effort is being made to process license applications as quickly as possible. We expect the bulk of licenses to be issued within the coming weeks.

If you have questions or concerns, please call the Washington State Liquor and Cannabis Board Enforcement and Education Division at (360) 664-1724.
