Anne E. Kirkpatrick  
Chief of Police

December 14<sup>th</sup>, 2011

## PETITION TO ADD RESTRICTED PRODUCTS

On May 15<sup>th</sup>, 2010 the Washington State Liquor Control Board by resolution recognized the City of Spokane's request for a mandatory Downtown Alcohol Impact Area. The requested banned products list was compiled by observation of the products that were being sold by the licensees within the Downtown AIA and of which the empty containers of fortified beer products were found cluttering the streets, sidewalks and business entryways.

Since implementation of the Downtown Urban Core AIA, beer manufacturers have created some new labels and are encouraging our local distributors to push these products on licensees located within our AIA. Since these new labels are not on the current banned product list, we are getting complaints from licensees who are trying to abide by the intent of the AIA program. We are also receiving complaints from downtown businesses and patrol officers who are seeing an increase in the use of these new labels by the chronic inebriates.

In accordance with WSR 10-19-065 which went into effect on October 16<sup>th</sup>, 2010, the City of Spokane and the Spokane Police Department requests the Washington State Liquor Control Board recognize the following products as significantly and materially the same in size, content, alcohol percent and price as those products currently listed on our Banned Product list. The following products are sold in similar container sizes and have a minimum alcohol content of 5.7 percent by volume.

The following products are currently being distributed to licensees within the Spokane Downtown Alcohol Impact Area and are being purchased by our local CPI's:

Vampt, Stack, Natty Daddy, Blast, Earthquake and Dog Bite.

<b>ANHEUSER-BUSCH</b>

10%

The City of Spokane has met with the two beer distributors in Spokane and they are advising us that the beer manufacturers or parent companies are pushing them to stock these products in the AIA. Odom's and King Distributing are at present encouraging the City to add these new products to the Downtown banned products list. We have been working with the Distributor's to come up with an ABV/Price Index that might be used in place of the current brand name system which would alleviate continual petitions to add products, but as of this date have been unable to come up with a simple solution.

The City of Spokane hereby requests the above listed products be added to the current banned product list for the Downtown AIA.

Sincerely,

*Scott A. Stephens* 12/15/11
