• **License Limits**
  - Licensed entity or principals limited to **three** one producer licenses
  - Licensed entity or principals limited to three processor licenses
  - Licensed entity or principals limited to three retail licenses. Multiple-location licensees not allowed to hold more than 33 percent of the allowed licenses in any county or city.

• **Producer License Reduction**
  - The WSLCB received 2,858 marijuana producer applications. The plant canopy of these applications far exceeds a manageable plant canopy set by the Board in its rules.
  - To make a manageable plant canopy for marijuana production, the Board filed an interim policy that limits any qualified entity or principals within any entity to one marijuana producer license.
  - Applicants will have the option of withdrawing their additional applications for a refund or having their additional applications held up to one year or until the Board determines more marijuana producer licenses are needed.

• **Production Limits**
  - The maximum amount of space for marijuana production is limited to two million square feet.
  - Applicants must designate on their operating plan the size category of the production premises and the actual square footage in their premises that will be designated as plant canopy. There are three categories:
    - Tier 1: Less than 2,000 square feet;
    - Tier 2: 2,000 square feet to 10,000 square feet;
    - Tier 3: 10,000 square feet to 30,000 square feet.
  - The LCB may reduce a licensee’s or applicants’ square footage designated to plant canopy for the following reasons:
    - If the total amount of square feet for production of all licensees exceeds the two million square feet maximum, the LCB will reduce the allowed square footage by the same percentage.
    - If 50 percent production space used for plant canopy in the licensee’s operating plan is not met in the first year of operation, the board may reduce the tier of licensure.
    - If the total amount of square feet of marijuana production exceeds two million square feet, the LCB may reduce all licensees’ production by the same percentage or reduce licensee production by one or more tiers by the same percentage.

*Note: The Board reduced the production capacity of all tiers by 30 percent to establish the market on February 19, 2014.*

• **Maximum Allowable Amount on Licensed Location**
  - **Producer license**
    - Outdoor or greenhouse: 125 percent of its year’s harvest
    - Indoor: six months of its annual harvest
  - **Processor license**
    - Six months of their average useable marijuana (plant material); and
    - Six months average of their total production (finished product).
  - **Retailer license**
    - Four months of their average inventory

• **Licensed Location: 1’000 foot Measurement**
  - Important Note Regarding the 1,000 foot Measurement: The LCB will file an emergency rule on November 6, 2013, that will revise the current language regarding the 1,000’ buffer. The language in the emergency rule will state: “The distance shall be measured as the shortest straight line distance
from the property line of the licensed premises to the property line of an elementary or secondary school, playground, recreation center or facility, child care center, public park, public transit center, library or arcade where admission is not restricted to those age 21 and older.”
