

Washington State
Liquor Control Board

Date: July 16, 2014

Subject: Threshold Decision Delegation (Marijuana-infused product, label, and packaging)

Approved:

Sharon Foster, Chairman

Ruthann Kurose, Board Member

Chris Marr, Board Member

The mission of the board is to keep alcohol, tobacco, and marijuana out of the hands of youth. There are marijuana-infused products on the medical marijuana market today that may be especially appealing to children. For example, products such as lollipops, gummy bears, and cotton candy are very appealing to children too young to read a label. The board has adopted emergency rules requiring a marijuana processor licensee to obtain board approval for all marijuana-infused products, labeling, and packaging prior to selling the items to marijuana retail licensees to sell to consumers.

The board is asked to delegate authority for threshold decisions (approvals and denials) on marijuana-infused products, labeling, and packaging to the Agency Director, and to authorize the Agency Director to further delegate the authority.
