

Bill Title: Marijuana Product Container Labels--Business Information

Bill Number: HB 2474

Effective Date: June 7, 2018

Amends: RCW 69.50.345

Background

A work group assembled by the WSLCB to address a variety of packaging and labeling issues, identified an issue that this bill addresses regarding retailer information on products. Because the product labeling requirements are required by statute, the LCB was not able to implement the change by rule and a legislative solution was required.

Summary

- Removes the requirement that the marijuana retailers that sells or offers for sale a product of marijuana, marijuana concentrates, usable marijuana or marijuana-infused product be identified on the product label.
- The business or trade name and Washington state unified business identifier number of the producer and processor must be included on product labels for marijuana, marijuana concentrates, usable marijuana or marijuana-infused product – as is already required under current law.
- Labels on marijuana products are not required to include any information about the retailer selling the marijuana product.
