### Regarding Title 314 WAC – Second Substitute House Bill 1210 Replacing “Marijuana” With “Cannabis”.

Date: July 6, 2022  
Presented by: Jeff Kildahl, Policy and Rules Coordinator

---

#### Background

The Washington State Legislature passed Second Substitute House Bill 1210 (Chapter 16, Laws of 2022) on March 11, 2022. In passing this bill, the legislature found that the use of the term "marijuana" in the United States has discriminatory origins and should be replaced with the more scientifically accurate term "cannabis". To this end, the bill replaced the term "marijuana" with the term "cannabis" throughout the Revised Code of Washington, including chapter 69.50 RCW, the Uniform Controlled Substances Act.

In addition to amendments to the Revised Code of Washington, Section 168 of the bill directed the LCB to use expedited rule making under RCW 34.05.353 to replace the term “marijuana” with the term “cannabis” throughout Title 314 WAC. This change was technical in nature, and no substantive changes were intended.

#### Stakeholder Engagement

Implementation of Second Substitute House Bill 1210 was dictated by statute and completed through expedited rulemaking. The amendments necessary to replace the term "marijuana" with the term "cannabis" in title 314 WAC are technical in nature, and no substantive changes were intended.

Because these amendments are technical in nature, and do not change the form or substance of these rules, a Listen and Learn forum was not held.

#### Rule Necessity

Amendments were needed to implement Section 168 of Second Substitute House Bill 1210, effective June 9, 2022.

Incomplete project applications will not be considered.

(c) The reviewer will review the application for a new research project or change to an existing approved research project pursuant to subsection (2)(c) of this section. The reviewer will supply a written evaluation to the WSLCB and the licensee in writing after completing review of the application for a new research project or a change to an existing approved research project. Evaluations will provide the approval recommendation status; determination(s) of the applicable research category or categories; and, as applicable, the reasons for a "Not Approved" recommendation.

**(6) Research license renewals.**

(a) Research license renewals operate on an annual basis, based on the license issuance date. (b) The reviewer will notify the WSLCB in writing if the licensee meets the requirements for renewal not later than (~~((fifteen))~~) 15 days prior to the licensee's renewal date.

(c) If the reviewer determines that the research project does not meet requirements for renewal due to lack of an ongoing project or for failure to meet the requirements of RCW 69.50.372 or this section for a proposed new project, the reviewer will recommend the WSLCB not renew the license.

(d) The WSLCB will review the licensee's violation history and criminal background check prior to renewal. If the violation history or criminal records disqualifies the licensee from eligibility for a research license under WAC 314-55-050, the WSLCB will not renew the license.

**(7) License revocation.**

(a) The WSLCB may revoke an application for the following reasons:

(vii) The licensee violates any provision of chapter 69.50 RCW or this chapter.

(b) A licensee may request voluntary cancellation of a license at any time. The licensee must request cancellation of a research license to the WSLCB in writing. The voluntary cancellation of a research license does not result in a hearing right.

**(8) ((Marijuana)) Cannabis disposal requirements.**

(a) Licensees must dispose of ((marijuana)) cannabis as provided in WAC 314-55-097.

(b) Licensees must dispose of ((marijuana)) cannabis if the research license is discontinued for any reason. A licensee may transfer plants to another ((marijuana)) cannabis research licensee. A licensee may work with the WSLCB to dispose of ((marijuana or marijuana)) cannabis or cannabis plants.

(9) An applicant or licensee may request an administrative hearing to contest the withdrawal, denial, nonrenewal, or revocation of a research license pursuant to chapter 34.05 RCW. (2) Wastewater generated during ((~~marijuana~~)) cannabis production and processing must be disposed of in compliance with applicable state and local laws and regulations.

(3) Wastes from the production and processing of ((~~marijuana~~)) cannabis plants must be evaluated against the state's dangerous waste regulations (chapter 173-303 WAC) to determine if those wastes designate as dangerous waste. It is the responsibility of each waste generator to properly evaluate their waste to determine if it is designated as a dangerous waste. If a generator's waste does designate as a dangerous waste, then that waste(s) is subject to the applicable management standards found in chapter 173-303 WAC.

(a) Wastes that must be evaluated against the dangerous waste regulations include, but are not limited to, the following:

(i) Waste from ((~~marijuana~~)) cannabis flowers, trim and solid plant material used to create an extract (per WAC 314-55-104).

(ii) Waste solvents used in the ((~~marijuana~~)) cannabis process (per WAC 314-55-104).

(iii) Discarded plant waste, spent solvents and laboratory wastes from any ((~~marijuana~~)) cannabis processing or quality assurance testing.

AMENDATORY SECTION (Amending WSR 17-12-032, filed 5/31/17, effective 8/31/17)

**WAC 314-55-0995 Laboratory certification and accreditation requirements.** The following requirements apply to third-party labs seeking certification by the WSLCB or its designee to do quality assurance testing on ((marijuana)) cannabis and ((marijuana)) cannabis products in Washington state, and for certified third-party laboratories (certified labs) to remain certified by the WSLCB. The requirements provided in this section are continuing requirements, and must be adhered to and maintained for a third-party lab to remain certified. The WSLCB may summarily suspend a lab's certification if a certified lab is found out of compliance with the requirements of this chapter.

(1) A third-party laboratory must be certified by the WSLCB or their vendor as meeting the WSLCB's accreditation and other requirements prior to conducting quality assurance tests required under this chapter. Certified labs must conspicuously display the certification letter received by the WSLCB upon certification at the lab's premises in a conspicuous location where a customer may observe it unobstructed in plain sight.

(2) A person with financial interest in a certified lab may not have direct or indirect financial interest in a licensed ((marijuana)) cannabis producer or processor for whom they are conducting required quality assurance tests. A person with direct or indirect financial interest in a certified lab must disclose to the WSLCB by affidavit any direct or indirect financial interest in a licensed ((marijuana)) cannabis producer or processor.

(3) The following provisions are conditions of certification for third-party testing labs. Failure to adhere to the below requirements may result in the suspension or revocation of certification.

(a) Each lab must employ a scientific director responsible to ensure the achievement and maintenance of quality standards of practice. The scientific director must possess the following minimum qualifications:

(i) A doctorate in the chemical or microbiological sciences from a college or university accredited by a national or regional certifying authority with a minimum of two years' post-degree laboratory experience;

(ii) A master's degree in the chemical or microbiological sciences from a college or university accredited by a national or regional certifying authority with a minimum of four years' of post-degree laboratory experience; or

(b) Certified labs must follow the analytical requirements most current version of the *Cannabis Inflorescence and Leaf Monograph* published by the *American Herbal Pharmacopoeia* or notify the WSLCB or its designee what alternative scientifically valid testing methodology the lab is following for each quality assurance test. Third-party validation by the WSLCB or its designee is required for any monograph or analytical method followed by a certified lab to ensure the methodology produces scientifically accurate results prior to use of alternative testing methods to conduct required quality assurance tests.

(c) The WSLCB may require third-party validation and ongoing monitoring of a certified lab's basic proficiency to correctly execute the analytical methodologies employed by the certified lab. The WSLCB may contract with a vendor to conduct the validation and ongoing monitoring described in this subsection. The certified lab must pay all vendor fees for validation and ongoing monitoring directly to the WSLCB's vendor.

(4) Certified labs must allow the WSLCB or the WSLCB's vendor to conduct physical visits and inspect related laboratory equipment, testing and other related records during normal business hours without advance notice.

(5) As a condition of certification, labs must adopt and follow minimum good lab practices (GLPs) as provided in WAC 314-55-103, and maintain internal standard operating procedures (SOPs), and a quality control/quality assurance (QC/QA) program as specified by the WSLCB. The WSLCB or authorized third-party organization (WSLCB's designee) may conduct audits of a lab's GLPs, SOPs, QC/QA, and inspect all other related records.

(6) The WSLCB or its designee will take immediate disciplinary action against any certified lab that fails to comply with the provisions of this chapter or falsifies records related to this section including, without limitation, revoking the certification of the certified lab.

(g) **Heavy metal screening.** Heavy metal screening is required for all DOH compliant product as described in chapter 246-70 WAC. Heavy metal screening is optional for non-DOH compliant product; however, heavy metal limits provided below apply to all products. Any product exceeding the provided limits is subject to recall and destruction. The board may conduct random or investigation driven heavy metal

screening for compliance. A sample and related quantity of product fail quality control testing for heavy metals if the results exceed the limits provided in the table below.

Metal	µg/g
Arsenic	2.0
Cadmium	0.82
Lead	1.2
Mercury	0.40

(h) **Pesticide screening.** For purposes of pesticide screening, a sample and the related quantity of ((marijuana)) cannabis is considered to have passed if it meets the standards described in WAC 314-55-108 and applicable department of agriculture rules.

(4) **Required quality control tests.** The following quality control tests are required for each of the ((marijuana)) cannabis products described below. Licensees and certified labs may opt to perform additional quality control tests on the same sample.

(a) ((Marijuana)) **Cannabis flower.** ((Marijuana)) Cannabis flower requires the following quality control tests:

Product	Test(s) Required
(( <u>Marijuana</u> )) <u>Cannabis</u> flower	1. Water activity testing 2. Potency analysis 3. Foreign matter inspection 4. Microbiological screening 5. Mycotoxin screening 6. Pesticide screening

(b) If ((marijuana)) cannabis flower will be sold as useable flower, no further testing is required.

(c) **Intermediate products.** Intermediate products must meet the following requirements related to quality control testing:

(i) All intermediate products must be homogenized prior to quality assurance testing;

(ii) For the purposes of this section, a batch is defined as a single run through the extraction or infusion process;

(iii) ((Marijuana)) Cannabis mix must be chopped or ground so no particles are greater than 3 mm; and

(iv) Intermediate products require the following quality assurance tests:

Intermediate Product Type	Tests Required
(( <u>Marijuana</u> )) <u>Cannabis</u> mix	1. Water activity testing 2. Potency analysis 3. Foreign matter inspection 4. Microbiological screening 5. Mycotoxin screening 6. Pesticide screening

(d) **End products.** All ((~~marijuana~~, ~~marijuana-infused~~)) cannabis, cannabis-infused products, ((~~marijuana~~)) cannabis concentrates, ((~~marijuana~~)) cannabis mix packaged, and ((~~marijuana~~)) cannabis mix infused sold from a processor to a retailer require the following quality assurance tests:

End Product Type	Tests Required
Infused solid edible	1. Potency analysis 2. Water activity testing
Infused liquid (like a soda or tonic)	1. Potency analysis
Infused topical	1. Potency analysis
(( <del>Marijuana</del> )) <u>Cannabis</u> mix packaged (loose or rolled)	1. Potency analysis
(( <del>Marijuana</del> )) <u>Cannabis</u> mix infused (loose or rolled)	1. Potency analysis

(e) End products consisting of only one intermediate product that has not been changed in any way are not subject to potency analysis.

(5) Useable flower, a batch of ((~~marijuana~~)) cannabis concentrate, or a batch of ((~~marijuana-infused~~)) cannabis-infused product may not be sold until the completion and successful passage of required quality control testing, except:

(a) Licensees may wholesale and transfer batches or quantities of ((~~marijuana~~)) cannabis flower and other material that will be extracted, and ((~~marijuana~~)) cannabis mix and nonsolvent extracts, for the purposes of further extraction prior to completing required quality control testing.

(b) Business entities with multiple locations licensed under the same UBI number may transfer ((~~marijuana~~)) cannabis products between

the licensed locations under the same UBI number prior to quality control testing.

(c) Licensees may wholesale and transfer failed batches or quantities of ((~~marijuana~~)) cannabis flower to be extracted pursuant to subsection (6) of this section, unless failed for tests that require immediate destruction.

**(6) Failed test samples.**

(a) Upon approval by the board, failed quantities of ((~~marijuana~~)) cannabis or batches may be used to create extracts. After processing, the extract must pass all quality control tests required in this section before it may be sold, unless failed for tests that require immediate destruction.

(b) Retesting. A producer or processor must request retesting. The board may authorize the retest to validate a failed test result on a case-by-case basis. The producer or the processor requesting the retest must pay for the cost of all retesting.

(c) Remediation. Remediation is a process or technique applied to quantities of ((~~marijuana~~)) cannabis flower, lots, or batches. Remediation may occur after the first failure, depending on the failure, or if a retest process results in a second failure. Pesticide failures may not be remediated.

(i) Producers and processors may remediate failed ((~~marijuana~~)) cannabis flower, lots, or batches so long as the remediation method does not impart any toxic or harmful substance to the useable ((~~marijuana, marijuana~~)) cannabis, cannabis concentrates, or ((~~marijuana-infused~~)) cannabis-infused product. Remediation solvents or methods used on the ((~~marijuana~~)) cannabis product must be disclosed to:

(A) A licensed processor;

(B) The producer or producer/processor who transfers the ((~~marijuana~~)) cannabis products;

(C) A licensed retailer carrying ((~~marijuana~~)) cannabis products derived from the remediated ((~~marijuana~~)) cannabis flower, lot, or batch; or

(D) The consumer upon request.

(ii) The entire quantity of ((~~marijuana~~)) cannabis from which the failed sample(s) were deducted must be remediated.

(iii) No remediated quantity of ((~~marijuana~~)) cannabis may be sold or transported until quality control testing consistent with the requirements of this section is completed.

(iv) If a failed quantity of remediated ((~~marijuana~~)) cannabis is not remediated or reprocessed in any way after a first failure, it cannot be retested. Any subsequent certificates of analysis produced without remediation or reprocessing of the failed quantity of ((~~marijuana~~)) cannabis will not supersede the original compliance testing certificate of analysis.

**(7) Referencing.** Certified labs may reference samples for mycotoxins, heavy metals, and pesticides testing to other certified labs by subcontracting for those fields of testing. Labs must record all referencing to other labs on a chain-of-custody manifest that includes, but is not limited to, the following information: Lab name, certification number, transfer date, address, contact information, delivery personnel, sample ID numbers, field of testing, and receiving personnel.

(8) Certified labs are not limited in the amount of useable ((~~marijuana~~)) cannabis and ((~~marijuana~~)) cannabis products they may have on their premises at any given time, but a certified lab must have records proving all ((~~marijuana~~)) cannabis and ((~~marijuana-in-~~

fused)) cannabis-infused products in the certified lab's possession are held only for the testing purposes described in this chapter.

(9) A certificate of analysis issued by a certified lab for any ((marijuana)) cannabis product subject to the requirements of this chapter that has not already been transferred to a retail location expires 12 calendar months after issuance.

(10) The board, or its designee, may request that a licensee or a certified lab provide an employee of the board or their designee samples of ((marijuana)) cannabis or ((marijuana)) cannabis products, or samples of the growing medium, soil amendments, fertilizers, crop production aids, pesticides, or water for random or investigatory compliance checks. Samples may be randomly screened and used for other quality control tests deemed necessary by the board.

(11) All ((marijuana)) cannabis products produced, processed, distributed, or sold after the effective date of these rules, must comply with these rules and this chapter; however, postharvest products in the possession of or being processed by a licensee that do not comply with these rules as of their effective date may be sold, distributed, or both within a reasonable period of time, determined by the board.

AMENDATORY SECTION (Amending WSR 22-06-097, filed 3/2/22, effective 4/2/22)

**WAC 314-55-1025 Proficiency testing.** (1) For the purposes of this chapter, the following definitions apply:

(a) "Field of testing" means the categories of subject matter the laboratory tests, such as pesticide, microbial, potency, residual solvent, heavy metal, mycotoxin, foreign matter, and moisture content detection.

(b) "Proficiency testing (PT)" means the analysis of samples by a laboratory obtained from providers where the composition of the sample is unknown to the laboratory performing the analysis and the results of the analysis are used in part to evaluate the laboratory's ability to produce precise and accurate results.

(c) "Proficiency testing (PT) program" means an operation offered by a provider to detect a laboratory's ability to produce valid results for a given field of testing.

(d) "Provider" means a third-party company, organization, or entity not associated with certified laboratories or a laboratory seeking certification that operates an approved PT program and provides samples for use in PT testing.

(e) "Vendor" means an organization(s) approved by the board to certify laboratories for ((marijuana)) cannabis testing, approve PT programs, and perform on-site assessments of laboratories.

(2) The board or its vendor determines the sufficiency of PTs and maintains a list of approved PT programs. Laboratories may request authorization to conduct PT through other PT programs but must obtain approval for the PT program from the board or the board's vendor prior to conducting PT. The board may add the newly approved PT program to the list of approved PT programs as appropriate.

(3) As a condition of certification, laboratories must participate in PT and achieve a passing score for each field of testing for which the lab will be or is certified.

(4) A laboratory must successfully complete a minimum of one round of PT for each field of testing the lab seeks to be certified for and provide proof of the successful PT results prior to initial certification.

(5)(a) A certified laboratory must participate in a minimum of two rounds of PT per year for each field of testing to maintain its certification.

(b) To maintain certification, the laboratory must achieve a passing score, on an ongoing basis, in a minimum of two out of three successive rounds of PT. At least one of the scores must be from a round of PT that occurs within six months prior to the laboratory's certification renewal date.

(6) If the laboratory fails to achieve a passing score on at least 80 percent of the analytes in any proficiency test, the test is considered a failure. If the PT provider provides a pass/fail on a per analyte basis but not on the overall round of PT the lab participates in, the pass/fail evaluation for each analyte will be used to evaluate whether the lab passed 80 percent of the analytes. If the PT provider does not provide individual acceptance criteria for each analyte, the following criteria will be applied to determine whether the lab achieves a passing score for the round of PT:

(a) +/- 30% recovery from the reference value for residual solvent testing; or

(b) +/- 3 z or 3 standard deviations from the reference value for all other fields of testing.

(7) If a laboratory fails a round of PT or reports a false negative on a micro PT, the laboratory must investigate the root cause of the laboratory's performance and establish a corrective action report for each unsatisfactory analytical result. The corrective action report must be kept and maintained by the laboratory for a period of three years, available for review during an on-site assessment or inspection, and provided to the board or the board's vendor upon request.

(8) Laboratories are responsible for obtaining PT samples from vendors approved by the board or the board's vendor. Laboratories are responsible for all costs associated with obtaining PT samples and rounds of PT.

(9) The laboratory must manage, analyze and report all PT samples in the same manner as customer samples including, but not limited to, adhering to the same sample tracking, sample preparation, analysis methods, standard operating procedures, calibrations, quality control, and acceptance criteria used in testing customer samples.

(10) The laboratory must authorize the PT provider to release all results at the same time, whether pass or fail, to the laboratory and the board, or the board's vendor.

(11) The board may require the laboratory to submit raw data and all photographs of plated materials along with the report of analysis of PT samples. The laboratory must keep and maintain all raw data and all photographs of plated materials from PT for a period of three years.

(12) The board may waive proficiency tests for certain fields of testing if PT samples or PT programs are not readily available or for other valid reasons as determined by the board.

(13)(a) The board will suspend a laboratory's certification if the laboratory fails to maintain a passing score on an ongoing basis in two out of three successive PT studies. The board may reinstate a laboratory's suspended certification if the laboratory successfully

analyzes PT samples from the board or the board's vendor approved PT provider, so long as the supplemental PT studies are performed at least 15 days apart from the analysis date of one PT study to the analysis date of another PT study.

(b) The board will suspend a laboratory's certification if the laboratory fails two consecutive rounds of PT. The board may reinstate a laboratory's suspended certification once the laboratory conducts an investigation, provides the board a deficiency report identifying the root cause of the failed PT, and successfully analyzes PT samples from a board or board's vendor approved PT provider. The supplemental PT studies must be performed at least 15 days apart from the analysis date of one PT study to the analysis date of another PT study.

(14) If a laboratory fails to remediate and have its certification reinstated under subsection (13)(a) or (b) of this section within six months of the suspension, the laboratory must reapply for certification as if the laboratory was never certified previously.

(15) A laboratory that has its certification suspended or revoked under this section may request an administrative hearing to contest the suspension as provided in chapter 34.05 RCW.

33.	Estimation of uncertainty of measurement.	-	-	-	-	-
a.	Testing laboratories shall have and shall apply procedures for estimating uncertainty of measurement. The laboratory shall at least attempt to identify all the components of uncertainty and make a reasonable estimation, and shall ensure that the form of reporting of the result does not give a wrong impression of the uncertainty. Reasonable estimation shall be based on knowledge of the performance of the method and on the measurement scope and shall make use of, for example, previous experience and validation data.	-	-	-	-	-
b.	In those cases where a well-recognized test method specifies limits to the values of the major sources of uncertainty of measurement and specifies the form of presentation of calculated results, the laboratory is considered to have satisfied this clause by following the test method and reporting instructions.	-	-	-	-	-
c.	When estimating the uncertainty of measurement, all uncertainty components which are of importance in the given situation shall be taken into account using appropriate methods of analysis.	-	-	-	-	-

AMENDATORY SECTION (Amending WSR 18-11-005, filed 5/2/18, effective 1/1/19)

**WAC 314-55-106 ((Marijuana)) Cannabis warning symbol requirement.** The following requirements are in addition to the packaging and labeling requirements provided in WAC 314-55-105.

(1) ((Marijuana-infused)) Cannabis-infused products for oral ingestion sold at retail must be labeled on the principal display panel or front of the product package with the "not for kids" warning symbol ("warning symbol") created and made available in digital form to licensees without cost by the Washington poison center (WPC). The warning symbol may be found on the WPC's website.

(a) The warning symbol must be of a size so as to be legible, readily visible by the consumer, and effective to alert consumers and children that the product is not for kids, but must not be smaller than three-quarters of an inch in height by one-half of an inch in width; and

(b) The warning symbol must not be altered or cropped in any way other than to adjust the sizing for placement on the principal display panel or front of the product package, except that a licensee must use a black border around the edges of the white background of the warning symbol image when the label or packaging is also white to ensure visibility of the warning symbol.

(c) Licensees may download the digital warning symbol from the WPC and print stickers, or purchase and use a sticker made available by the WPC, in lieu of incorporating the warning symbol on the label or packaging as required under subsection (1) of this section. If a licensee elects to use a warning symbol sticker, the sticker:

(i) Must meet all requirements of (a) and (b) of this subsection; and

(ii) Must not cover or obscure in any way labeling or information required on ((marijuana)) cannabis products by WAC 314-55-105.

(2) All ((marijuana)) cannabis products sold at retail must be labeled on the principal display panel or front of the product package with the ((marijuana)) cannabis universal symbol ("universal symbol") created and made available in digital form to licensees without cost by the WSLCB. The digital file for the universal symbol is available on the WSLCB's website.

(a) The universal symbol must be of a size so as to be legible, readily visible by the consumer, and effective to alert consumers that the product is or contains ((marijuana)) cannabis, but must not be smaller than three-quarters of an inch in height by three-quarters of an inch in width;

(b) The universal symbol must not be altered or cropped in any way other than to adjust the sizing for placement on the principal display panel or front of the product package; and

(c) Licensees may download the digital universal symbol from the WSLCB's website and print stickers in lieu of incorporating the universal symbol on the label or packaging as required under (a) and (b) of this subsection. If a licensee elects to use a universal symbol sticker, the sticker:

(i) Must meet all requirements of this section; and

(ii) Must not cover or obscure in any way labeling or information required on ~~((marijuana))~~ cannabis products by WAC 314-55-105.

(3) For the purposes of this section, "principal display panel" means the portion(s) of the surface of the immediate container, or of any outer container or wrapping, which bear(s) the labeling designed to be most prominently displayed, shown, presented, or examined under conditions of retail sale. "Immediate container" means the external container holding the ~~((marijuana))~~ cannabis product.

AMENDATORY SECTION (Amending WSR 16-11-110, filed 5/18/16, effective 6/18/16)

**WAC 314-55-107 ~~((Marijuana))~~ Cannabis product compliance.** A ~~((marijuana))~~ cannabis compliant product must meet all requirements in the department of health rules found in chapter 246-70 WAC in addition to all WSLCB requirements found in chapter 314-55 WAC.

AMENDATORY SECTION (Amending WSR 18-22-056, filed 10/31/18, effective 12/1/18)

**WAC 314-55-109 Cannabinoid additives—Requirements, restrictions, and quality assurance testing.** (1) As provided in RCW 69.50.326 Licensed ~~((marijuana))~~ cannabis producers and licensed ~~((marijuana))~~ cannabis processors may use a cannabidiol (CBD) product obtained from a source not licensed under this chapter, provided the CBD product:

(a) Has a THC level of 0.3 percent or less; and

(b) Has been tested for contaminants and toxins by a testing laboratory accredited under this chapter and in accordance with testing standards established in this section.

(2) Licensed ~~((marijuana))~~ cannabis producers and licensed ~~((marijuana))~~ cannabis processors may use a CBD product obtained from a source not licensed under this chapter and chapter 69.50 RCW as an additive for the purpose of enhancing the CBD concentration of any product authorized for production, processing, and sale under this chapter. However, useable ~~((marijuana))~~ cannabis, except ~~((marijuana))~~ cannabis that is an intermediate product that will be converted into a ~~((marijuana-infused))~~ cannabis-infused product or a ~~((marijuana))~~ cannabis concentrate, may not be treated or otherwise adulterated in any way including the addition of a CBD product consistent with the rules of this chapter. Except as allowed under this section, CBD product ad-

ditives must be lawfully produced by, or purchased from, a producer or processor licensed under this chapter. The testing requirements for CBD products derived from ((marijuana)) cannabis produced by ((marijuana)) cannabis licensees are provided in WAC 314-55-102. The testing requirements in this section are required in addition to quality assurance testing otherwise required under this chapter for ((marijuana)) cannabis products.

(3) **Traceability requirements.** A licensee must enter CBD products obtained from a source not licensed under this chapter into the state traceability system and keep the information in the traceability system completely up to date, consistent with ((marijuana)) cannabis and ((marijuana)) cannabis product recordkeeping and traceability requirements in WAC 314-55-083. A licensee must keep CBD products obtained from a source not licensed under this chapter labeled and quarantined in an area separate from ((marijuana)) cannabis and ((marijuana)) cannabis products under video surveillance consistent with the requirements for controlled areas in WAC 314-55-083(3) until the CBD products successfully pass quality assurance testing or are destroyed due to failure of tests as provided in this section. At no time during the quarantine period can the product be handled or moved under any circumstances, except for purposes of deducting samples as required under this section, and is subject to auditing by the WSLCB or its designee(s). CBD products obtained from a source not licensed under this chapter that fail quality assurance testing as provided in this section must not be added to any ((marijuana)) cannabis product and must be disposed of consistent with WAC 314-55-097 and the disposal logged into the traceability system consistent with WAC 314-55-083.

(4) **Testing requirements.** The following sample deduction and testing requirements apply to CBD products obtained from a source not licensed under this chapter. Such products must successfully pass quality assurance testing prior to being added to any ((marijuana)) cannabis product. Samples that fail quality assurance testing and the corresponding products that the samples were deducted from must be disposed of consistent with WAC 314-55-097.

(a) **Sample size and deduction requirements.** Licensed producers, licensed processors, certified labs, and their employees must adhere to the minimum sampling protocols as provided in this section. Samples must be deducted in a way that is most representative of the product the sample is deducted from. The minimum sample size for the testing requirements under this section for CBD products is one percent of the product as packaged by the manufacturer of the CBD product but in no case shall the sample be less than two grams. Licensees, certified labs, and their employees may not adulterate or change in any way the representative sample before the sample is tested.

(i) All samples must be collected/deducted in a sanitary environment using sanitary practices and ensure facilities are constructed, kept, and maintained in a clean and sanitary condition in accordance with rules and as prescribed by the Washington state department of agriculture under chapters 16-165 and 16-167 WAC.

(ii) Persons collecting samples must wash their hands prior to collecting a sample, wear appropriate gloves, and must use sanitary utensils and storage devices when collecting samples.

(iii) Samples must be placed in a sanitary plastic or glass container and stored in a location that prevents the propagation of pathogens and other contaminants, such as a secure, low-light, cool and dry location.

(iv) The licensee must maintain the CBD products from which the sample was deducted in a secure, low-light, cool, and dry location to prevent the products from becoming contaminated or degraded prior to the CBD products being added or incorporated into ((marijuana)) cannabis products after successful passage of testing requirements.

(v) Each quality assurance sample must be clearly marked "quality assurance sample" and be labeled with the following information:

(A) The unique identifier for the product generated by the state traceability system;

(B) The name of the certified lab receiving the sample;

(C) The license number and business or trade name of the licensee sending the sample;

(D) The date the sample was collected; and

(E) The weight of the sample.

(vi) Certified labs may retrieve samples from a ((marijuana)) cannabis licensee's licensed premises and transport the sample(s) directly to the lab. Certified labs may also return any unused portion of the sample(s).

(b) **Required fields of testing.**

(i) **Potency testing.** Potency testing is required to confirm the product is less than 0.3 percent THC, contains detectable levels of CBD, and to determine the levels of THC, THC-A, CBD, and CBD-A in the product. Synthetic cannabinoids as defined in RCW 69.50.204 are prohibited under RCW 69.50.401 and any test result that suggests the presence of a synthetic cannabinoid must be immediately reported to the WSLCB.

(A) Certified labs must test and report the following cannabinoids to the WSLCB in the state traceability system when testing for potency:

(I) THCA;

(II) THC;

(III) Total THC;

(IV) CBDA;

(V) CBD; and

(VI) Total CBD.

(B) Calculating total THC and total CBD.

(I) Total THC must be calculated as follows, where M is the mass or mass fraction of delta-9 THC or delta-9 THCA:  $M \text{ total delta-9 THC} = M \text{ delta-9 THC} + (0.877 \times M \text{ delta-9 THCA})$ .

(II) Total CBD must be calculated as follows, where M is the mass or mass fraction of CBD and CBDA:  $M \text{ total CBD} = M \text{ CBD} + (0.877 \times M \text{ CBDA})$ .

(C) Regardless of analytical equipment or methodology used for testing, certified labs must accurately measure and report the acidic (THCA and CBDA) and neutral (THC and CBD) forms of the cannabinoids.

(D) The following potency results fail quality assurance testing for the purposes of this section and the sample and corresponding product from which the sample was deducted must be disposed of consistent with this section and WAC 314-55-097:

(I) The CBD product tests above 0.3 percent THC;

(II) The CBD product does not contain any detectable amounts of CBD or CBD-A; and

(III) The sample test results indicate that a substance is present that is not THC, CBD, or inert substance which the THC or CBD is dissolved into.

(ii) **Pesticide screening.**

(A) Certified third-party labs must screen for any pesticides that are not allowed and are designated as having the potential for misuse on a list created, maintained, and periodically updated by the department of health in consultation with the Washington state department of agriculture and the WSLCB.

(B) If the WSLCB, WSDA, other designee of the WSLCB, or certified lab identifies a pesticide that is not allowed for use or application on ((marijuana)) cannabis under this chapter and is above the action levels provided in WAC 314-55-108, that sample and corresponding product from which the sample was deducted has failed quality assurance testing. A sample that tests at or above the action levels for pesticides consistent with WAC 314-55-108 fails pesticide testing requirements for the purposes of this section. A sample and corresponding product from which the sample was deducted that fails quality assurance testing under this section must be destroyed consistent with WAC 314-55-097.

(C) Certified third-party labs must also screen for pyrethrins and piperonyl butoxide (PBO) in samples of CBD products obtained from a source not licensed under this chapter. Certified third-party labs may also screen for additional pesticides not specifically required under this section and per the DOH list, however, any sample that tests at or above the action level for any pesticide(s) as established in WAC 314-55-108 fails the testing requirements under this section and must be disposed of consistent with WAC 314-55-097.

(iii) **Heavy metal screening.** For the purposes of heavy metal screening, a sample fails quality assurance testing and must be disposed of consistent with WAC 314-55-097 if it meets or exceeds the following limits:

Metal	Limit, µg/daily dose (5 grams)
Inorganic arsenic .....	10.0
Cadmium .....	4.1
Lead .....	6.0
Mercury .....	2.0

(iv) **Residual solvents screening.** Certified labs must test for the solvents listed in the table below at a minimum. Except as otherwise provided in this subsection, a sample and corresponding product from which the sample was deducted fail quality assurance testing for residual solvents and must be disposed of consistent with WAC 314-55-097 if the results meet or exceed the limits provided in the table below. Residual solvent results of more than 5,000 ppm for class three solvents, 50 ppm for class two solvents, and 2 ppm for class one solvents as defined in *United States Pharmacopoeia, USP 30 Chemical Tests / <467> - Residual Solvents (USP <467>)* not listed in the table below fail quality assurance testing.

Solvent	ppm
Acetone	5,000
Benzene	2
Butanes	5,000
Cyclohexane	3,880
Chloroform	2
Dichloromethane	600

Solvent	ppm
Ethyl acetate	5,000
Heptanes	5,000
Hexanes	290
Isopropanol (2-propanol)	5,000
Methanol	3,000
Pentanes	5,000
Propane	5,000
Toluene	890
Xylene*	2,170

\* Usually 60% *m*-xylene, 14% *p*-xylene, 9% *o*-xylene with 17% ethyl benzene.

(v) **Microbiological screening.** The sample and corresponding product from which the sample was deducted fail quality assurance testing for microbiological screening and must be disposed of consistent with WAC 314-55-097 if the results exceed the following limits:

	Enterobacteria (bile-tolerant gram-negative bacteria)	<i>E. coli</i> (pathogenic strains) and <i>Salmonella spp.</i>
Unprocessed Plant Material	10 <sup>4</sup>	Not detected in 1g
Extracted or Processed Botanical Product	10 <sup>3</sup>	Not detected in 1g

(vi) **Mycotoxin screening.** The sample and corresponding product from which the sample was deducted fail quality assurance testing for mycotoxin screening and must be disposed of consistent with WAC 314-55-097 if the results exceed the following limits:

- (A) Total of Aflatoxin B1, B2, G1, G2: 20 µg/kg of substance; and
- (B) Ochratoxin A: 20 µg/kg of substance.

(5) **Test results reporting requirements.** Certified labs must report all test results as required by this section into the state traceability system within ((~~twenty-four~~)) 24 hours of completion of the tests.

(6) **Retesting.** At the request of the producer or processor, the WSLCB may authorize a retest to validate a failed test result on a case-by-case basis. All costs of the retest will be borne by the producer or the processor requesting the retest. Potency retesting will generally not be authorized.

(7) **Remediation.** Producers and processors may remediate failed products so long as the remediation method does not impart any toxic or deleterious substance to the CBD products obtained from a source outside the regulated system. Remediation solvents or methods used on the product must be disclosed to a licensed processor the producer or producer/processor transfers the products to; a licensed retailer carrying ((~~marijuana~~)) cannabis products derived from the remediated product; or consumer upon request. The product(s) the failed sample(s) were deducted from must be remediated using the same remediation technique. No remediated CBD products obtained from a source outside the regulated system may be sold, transported, or used in the processing

of ((marijuana)) cannabis products until the completion and successful passage of quality assurance testing as required in this section.

(8) A licensee or certified lab that violates any of the provisions of this section is subject to disciplinary action, including possible summary suspension or revocation of the producer license, processor license, producer/processor license, or lab certification.

AMENDATORY SECTION (Amending WSR 16-16-050, filed 7/27/16, effective 8/27/16)

**WAC 314-55-225 ~~((Marijuana))~~ Cannabis recalls. (1) Definitions.** For the purposes of this section, the following definitions apply:

(a) "Affected product" means ~~((marijuana, usable marijuana, marijuana))~~ cannabis, useable cannabis, cannabis concentrates, or ~~((marijuana-infused))~~ cannabis-infused products subject to a recall.

(b) "Affected licensee" means a licensee whose ~~((marijuana, usable marijuana, marijuana))~~ cannabis, useable cannabis, cannabis concentrates, or ~~((marijuana-infused))~~ cannabis-infused products are subject to a recall. More than one licensee may be an affected licensee in a recall.

(2) **Exempt market withdrawals.**

(a) A licensee may withdraw from the market (~~((marijuana, usable marijuana, marijuana))~~) cannabis, useable cannabis, cannabis concentrates, or (~~((marijuana-infused))~~) cannabis-infused products by its own determination for reasons that do not pose a risk to consumers such as for aesthetic reasons or other similar deficiencies in product or packaging.

(b) If a licensee initiates a market withdrawal for a reason that does not pose a risk to consumers, the licensee must notify the WSLCB by contacting the local WSLCB enforcement officer assigned to the local area within (~~((forty-eight))~~) 48 hours of beginning the market withdrawal. Licensees withdrawing (~~((marijuana, usable marijuana, marijuana))~~) cannabis, useable cannabis, cannabis concentrates, or (~~((marijuana-infused))~~) cannabis-infused products under this subsection (2), for reasons other than risk to consumers, are exempt from the remaining requirements of this section.

(3)(a) **When a recall is required.** A recall is required when circumstances exist that pose a risk to consumers. Factors that contribute to a determination of a recall situation include, but are not limited to, the following:

(i) Evidence that pesticides not approved by the board are present on or in (~~((marijuana, usable marijuana, marijuana))~~) cannabis, useable cannabis, cannabis concentrates, or (~~((marijuana-infused))~~) cannabis-infused products above the action levels prescribed by board rule;

(ii) Evidence that residual solvents are present on or in (~~((marijuana, usable marijuana, marijuana))~~) cannabis, useable cannabis, cannabis concentrates, or (~~((marijuana-infused))~~) cannabis-infused products at levels above the action levels prescribed by board rule; or

(iii) Evidence of another condition that poses a risk to consumers including, but not limited to, ingredients in (~~((marijuana-infused))~~) cannabis-infused products that are unfit for human consumption.

(b) **Licensee-initiated recalls.**

(i) If a licensee initiates a recall due to a condition that poses a risk to consumers and would make a recall appropriate under this subsection (3), the licensee must:

(A) Immediately notify the local WSLCB enforcement officer; and

(B) Secure, isolate, and prevent the distribution of all (~~((marijuana, usable marijuana, marijuana))~~) cannabis, useable cannabis, cannabis concentrates, or (~~((marijuana-infused))~~) cannabis-infused products that may have been exposed to the condition warranting the recall. The licensee is prohibited from destroying any affected product prior to notifying the (~~((WSLCB-[WSLCB]))~~) WSLCB and coordinating with the local WSLCB officer on destruction activities.

(ii) If the WSLCB determines the licensee fails to engage in recall efforts that meet the urgency of the risk to consumers, the WSLCB may seek a board-directed recall as provided in this section depending on the circumstances.

(c) **WSLCB investigation-initiated recalls.**

(i) If the WSLCB determines that a recall is not appropriate after an investigation, the WSLCB enforcement division may release administrative holds placed on (~~((marijuana, usable marijuana, marijuana))~~) cannabis, useable cannabis, cannabis concentrates, or (~~((marijuana-infused))~~) cannabis-infused products as part of the investigation as appropriate, unless an administrative hold is necessary under a continuing investigation.

(ii) If the WSLCB determines that a recall is appropriate after an investigation, the WSLCB notifies the board and requests the board issue a recall. If the board issues a recall, the WSLCB notifies the affected licensee that is the source of the issue giving rise to a recall.

(d) **Recall plans.** All licensees must develop a recall plan within ~~((sixty))~~ 60 days of the effective date of this section that sets the procedures the licensee will follow in the event of a recall of the licensee's product or products under the licensee's control. If a licensee becomes an affected licensee as part of a recall and the affected licensee distributed affected product to consumers or to retailers, the affected licensee must immediately notify all licensees that received affected product, and issue a press release and other appropriate public notification to inform consumers of the recall and identifying information about the affected product recalled.

(i) A recall plan must include, at a minimum, the following:

(A) Designation of a member of the licensee's staff who serves as the licensee's recall coordinator;

(B) Procedures for identifying and isolating product to prevent or minimize its distribution to consumers;

(C) Procedures to retrieve and destroy product; and

(D) A communications plan to notify those affected by the recall, including:

(I) How the affected licensee will notify other licensees in possession of product subject to the recall; and

(II) The use of press releases and other appropriate notifications to ensure consumers are notified of the recall and affected product information if the affected product was distributed to consumers.

(ii) A recall must follow the procedures outlined in the recall plan unless otherwise agreed by the WSLCB and the licensee. The affected licensee must ensure recall procedures are conducted to maximize recall of affected product and minimize risks to consumers.

(e) **Destruction of affected product.** An affected licensee must coordinate destruction of affected product with the local WSLCB enforcement officer and allow ~~((WSLCB-[WSLCB]))~~ WSLCB enforcement to oversee the destruction of affected product recalled to ensure the destruction of affected product that poses risks to consumers.

(f) **Recall reports and audit.** The affected licensee must track the total amount of affected product and the amount of affected product returned to the affected licensee as part of the recall effort. The affected licensee must report to the WSLCB periodically on the progress of the recall efforts. The periodic reports must occur at a minimum of once a week or as otherwise specified and agreed to by the WSLCB and the affected licensee in the recall plan.

(g) **Recall closure.** If the WSLCB determines that the recall efforts are successful and risks to public health and safety are no longer present, the WSLCB may recommend closure of the recall to the board.

(4) **Board-directed recall.**

(a) Upon the recommendation by the WSLCB enforcement division, the board may issue a directed recall if:

(i) The affected licensee does not comply with a recall under subsection (3) of this section;

(ii) The affected licensee does not comply with the recall plan or recall reporting requirements under subsection (3) of this section; or

(iii) The WSLCB enforcement division determines that affected product may be diverted or is being diverted from the licensed business, or another circumstance that makes the affected licensee's destruction of the product inadvisable or a risk to consumers.

(b) If the board issues a directed recall, the WSLCB will notify consumers of the recall and all licensees that may possess product affected by the recall if notice has not yet occurred.

(c) Under a directed recall, the WSLCB enforcement division may seek an order for destruction of the affected product from the board.

(i) If the board issues an order for destruction, the WSLCB enforcement division may seize and conduct the destruction of affected product.

(ii) An order for destruction will include notice to the licensee and opportunity for hearing before destruction, unless there is evidence of an immediate danger to public health, safety, or welfare to justify an immediate order for destruction, with an opportunity for an expedited hearing after the destruction.

(d) If a destruction order is issued and the WSLCB seizes product affected by the recall and conducts the destruction of the product, the affected licensee may be responsible for reimbursing the WSLCB for costs associated with product destruction.

(e) If the board finds that an immediate danger to the public health, safety, or welfare requires immediate WSLCB action, a licensee may also be subject to summary suspension under RCW 66.08.150(4).

(5) The WSLCB will maintain a recall web page on its website of all current and closed recalls of record.

(a) Accept the recommended penalty identified in the administrative violation notice;

(b) Request a settlement conference in writing;

(c) Request an administrative hearing in writing.

(4) A licensee may request a settlement conference to discuss the board's issuance of an administrative violation notice issued under this chapter. The hearing officer or designee of the board will arrange the date, time, and place of the settlement conference. (a) The purpose of the settlement conference is to:

(i) Discuss the circumstances associated with the alleged violation(s), including aggravating or mitigating factors;

(ii) Discuss the recommended penalties; and

(iii) Attempt to reach agreement on the appropriate penalty and corrective action plan for the administrative violation notice.

(b) During a settlement conference, a licensee issued an administrative violation notice may request deferral of an administrative violation notice if all of the following criteria are met:

(ii) The licensee has no other violation history in that penalty category within a two-year window; and

(iii) The licensee submits a plan to correct, remedy, or satisfy identified violations as described in the administrative violation notice including, but not limited to, monetary penalties.

(d) If the licensee is issued an administrative violation notice or any other notice of noncompliance at any time during the year following approval of the deferral of administrative violation, the record of the administrative violation notice will remain on the licensee's licensing history, and the original sanction for the deferred violation will be implemented based on the frame established in the settlement agreement, or ~~((ten))~~ 10 days from the date of default.

(5) The hearing officer or designee will prepare a settlement agreement. The agreement must:

(7) The hearing officer or designee will forward the settlement agreement to the board or designee for final approval. If the board, or designee approves the settlement agreement, a copy of the signed agreement will be sent to the licensee, and will become part of the licensing history, unless otherwise specified in this chapter.

AMENDATORY SECTION (Amending WSR 20-03-177, filed 1/22/20, effective 2/22/20)

**WAC 314-55-509 Penalty structure.** (1) The board determines if a penalty will be imposed. Penalties are based on the severity of the violation in the following categories:

- (a) Category I: Violations of a severity that would make a license eligible for cancellation on a first offense;
- (b) Category II: Violations that create a direct or immediate threat to public health, safety, or both;
- (c) Category III: Violations that create a potential threat to public health, safety, or both;
- (d) Category IV: Significant regulatory violations;
- (e) Category V: Procedural and operational violations;
- (f) Category VI: Statutory violations.

(2) For purposes of assessing penalties, only violations occurring in the two-year time period immediately preceding the date of the violation will be considered unless otherwise provided in this chapter.

(3) The board may, at its discretion, deviate from the prescribed penalties herein. Such deviations will be determined on a case-by-case basis, considering mitigating and aggravating factors.

(a) Mitigating factors may result in a waiving or lowering of fines, civil penalties, imposition of a fine in lieu of suspension, or fewer days of suspension. Mitigating factors may include demonstrated business policies and practices that may reduce risk to public health and safety.

(b) Aggravating factors may result in increased days of suspension, increased monetary penalties, cancellation, or nonrenewal of a ((marijuana)) cannabis license. Aggravating factors may include obstructing an investigation, business operations, behaviors, or both, that increase risk to public health and safety.

(4) For violations that occurred before the effective date of these rules, enforcement action will be based on the rules that were in effect on the date the violation occurred. Subsection (2) of this section shall apply to all enforcement actions regardless of the date the violation occurred.

### Background and reasons for adopting these rules:

The Washington State Legislature passed Second Substitute House Bill 1210 (Chapter 16, Laws of 2022) on March 11, 2022. In passing this bill, the legislature found that the use of the term "marijuana" in the United States has discriminatory origins and should be replaced with the more scientifically accurate term "cannabis". For this reason, the bill replaced the term "marijuana" with the term "cannabis" throughout the Revised Code of Washington, including chapter 69.50 RCW, the Uniform Controlled Substances Act. The bill also directed the Board to use expedited rulemaking to replace the term “marijuana” with “cannabis” throughout the rules of the Liquor and Cannabis Board in Title 314 WAC.

On July 6, 2022, the Washington State Liquor and Cannabis Board adopted rule amendments to Title 314 WAC to implement Second Substitute House Bill 1210.

### Rulemaking history for this adopted rule:

**CR 105** – filed April 27, 2022 as WSR #22-10-037.

**The effective date of these rules is August 6, 2022.**

Thank you for changing the nomenclature for cannabis.  
Names mean something.  
Its what we attach first judgements to, of ourselves and others.  
Not to mention living things.

The most egregious term that should be replaced is BLACK MARKET. It's origins should be obvious, a market for blacks originating in the 1800s. Please replace with illegal, underground, prohibited, or anything else excluding black. Yes I have been making these suggestions for the past 10 years, perhaps if cannabis was guided by a board that is not influenced by those addictive and deadly drugs they could hear our concerns.
