WSLCB Deliberative Dialogue Guidance

What is deliberative dialogue?

One of the most frequent uses of public dialogue is to initiate conversation between government and stakeholders or between government and citizens (Dale & Bird, 2010). There are various textures of dialogue, and deliberative dialogue is one of them.

According to the Oxford English Dictionary, dialogue is ‘a conversation carried out between two or more persons…a verbal exchange of thought.’ We can think of dialogue as being a shared inquiry - a way of thinking and reflecting together (Isaacs, 1999). However, dialogue is not about winning an argument or coming to agreement, but about increased understanding and learning (Heierbacher, 2012, emphasis added).

Yankelovich (1999) suggests three principles that are essential to genuine dialogue:

1) Establishing equity among participants and excluding coercive influences.
2) Listening with empathy.
3) Bringing assumptions into the open.

Dale & Bird (2010) add a fourth principle particularly relevant to public dialogue:

4) Encouraging diversity of perspectives.

In other words, dialogue is about creating meaning together, finding a shared understanding of an issue, and discovering what values are most important in resolving it. Dialogue is often open-ended, focused more on increasing understanding and developing relationships than on reaching an agreement. Deliberation, on the other hand, emphasizes the importance of examining options and trade-offs so people can make informed public decisions. The trust, mutual understanding, and relationships that are built during dialogue often lay the groundwork needed for effective deliberation. The process of deliberation is key to public engagement work as well, enabling people to discuss the consequences, costs and trade-offs of various policy options, and work through the emotions and values that are a necessary part of making recommendations and decisions. (Heierbacher, 2012).

Deliberative dialogue engages participants in policy discussion. This form of dialogue is a robust process that can be adapted to a variety of issues and to both stakeholder and citizen processes. Citizen processes are those in which people participate in their capacity as individuals. In contrast, some stakeholders participate as representatives of a certain interest group and may feel constrained to stay within the bounds of that interest group’s perspective. However, scholarship and years of practice demonstrate that deliberative dialogue can provide a space and process for all participants to meaningfully discuss multiple positions (Dale & Bird, 2010).

WSLCB is charged with ensuring the safety of Washington state residents. WSLCB works with the public on key decisions that affect the safety of Washingtonians, and the agency has a central role in creating regulatory frameworks to support that work. However, decision making is
not always an either/or choice. Both expert knowledge and public perspectives are crucial to the formulation of wise policy. And, wisdom can be characterized as the union of values and information. Policy based solely on technical or scientific knowledge is not necessarily wise policy. Sometimes there is not clear science to go on, as in the case of, for instance, vaping, or a new infectious disease, and science itself is not necessarily free of values. WSLCB encourages moving from yes/no options, to yes/and options, and creating opportunities for engagement. WSLCB believes that individuals have the capacity to be well informed just as experts have the capacity to better appreciate the concerns of the public.

Deliberative dialogue can serve many purposes:

- Resolve conflicts or differences of understanding, and bridge divides. Increasing opportunity for genuine dialogue between experts and citizens is a way to narrow the divide;
- Shifting the tone of public discourse on a contentious issue to courteous and solvable;
- Building understanding and knowledge about complex issues;
- Generating innovative solutions to problems;
- Inspiring collective or individual action; and
- Building civic capacity, or the ability for communities to solve their own public problems. (Heierbacher, 2012).

Techniques range from intimate, small-group dialogues to large televised forums involving hundreds or even thousands of participants. Evolving communication technologies have been integrated into these programs to overcome barriers of scale, geography, time, and more recently in limitations to in-person engagement as a result of the COVID-19 pandemic (Heierbacher, 2012).

WSLCB is introducing this form of engagement through moderated panel discussions, aligning with the Citizens Panel model (Crosby, Keller & Schaefer, 1986; Heierbacher, 2012; Dale & Bird, 2010).

How is deliberative dialogue different than debate?

What are the ground rules for dialogue?

1. The purpose of dialogue is to understand and to learn from one another (you cannot ‘win’ a dialogue).
2. All dialogue participants speak for themselves, not as a representative of others’ interests.
3. In a dialogue everyone is treated as an equal: leave status and stereotypes at the door.
4. Be open and listen to others, especially when you disagree. Suspend judgment.
5. Identify and test assumptions (even your own).
6. Listen carefully and respectfully to the views of others: acknowledge you have heard the other, especially when you disagree.
7. Look for common ground.
8. Express disagreement with ideas, not with personalities or motives (disagree without being disagreeable).
9. Respect all points of view.
10. The moderator guides the discussion, yet remains objective.

How are the sessions formatted?

- Each session is scheduled for approximately three hours.
- A panel will be scheduled for each session, comprised of:
  - **Panel 1**: Consumers (4 – 5 panelists, consisting of consumers, health care professionals, and others)
  - **Panel 2**: Processors (5- 6 panelists, consisting of processors/producers representing all tiers, indoor/outdoor growing methods, minority-owned businesses, and differing geographical regions throughout the state)
  - **Panel 3**: Labs (4 - 5 panelists, consisting of lab owners, employees, or both).
- The moderator will open each forum with topic background, panel introduction, and ground rules.
- Each panelist may provide an opening or introductory statement of approximately 5 minutes. The introductory statement may include the panelist’s background, a description of their interest and experience regarding the topic, and a brief outline or overview of ideas and thinking they wish to bring to the dialogue.
- Questions harvested from the initial panelist recruitment will be posed to the panel members for approximately one hour.
- The remainder of the meeting will be interactive (using the hand raising feature in WebEx) to allow participants and listeners to pose questions to the panel.

How can I participate in Deliberative Dialogue at WSLCB?

To sign up as a participant or listener for the **January 28, 2021 Consumer Perspectives Forum from 1:30 – 4:30**, please [register with WebEx](#).

To sign up as a participant or listener for the **February 4, 2021 Processor/Producer Perspectives Forum from 1:30 – 4:30**, please [register with WebEx](#).
To sign up as a participant or listener for the February 11, 2021 Accredited Lab Perspectives Forum from 1:30 – 4:30, please register with WebEx.

How are panelists selected?

WSLCB began panel recruitment on January 6, 2021. We asked for those interested in being a panelist, participant or listener to contact us by close of business, or 5PM on January 20, 2021, and provide some basic information to us:

1. Your name
2. Which of the three panels and dates you’d like to be considered for.
3. Your contact information (email and phone number)
4. Tell us if you are a consumer, producer, processor, producer/processor, retailer or lab employee or owner
5. If you are a processor, producer or processor/producer, tell us:
   a. Your tier size (1, 2, or 3);
   b. Whether you are an indoor or outdoor grower; and
   c. Where you are located.
6. Tell us three or four questions you’d like to ask others on your panel (for example, how do other producers sample? Or, when you purchase product, what are you looking for?)

On January 21, 2021, Policy and Rules staff will review submissions. Panelists are chosen to represent a diversity of views and experiences. Some elements of the selection process include, but are not limited to the following criteria:

1. Complete information (contact number and email address);
2. Whether the applicant fits the panel (for example, since we are looking for lab voices to be represented on a lab panel, is the applicant a lab owner, director or employee? For producers, is the applicant a tier 1, 2, or 3? Do they grow indoor or outdoor? Does the applicant represent the diversity of our licensee base (small, minority owned, large, mid-range, Eastern, Western part of the state, etc.)

Selected panelists will be notified on the afternoon of January 21, 2021. Rules and Policy staff will contact and provide each panelist a link for the date and time of your panel, along with additional information. People who applied for a panel positions who were not selected will be notified on January 22, 2021. However, if you are not selected, we strongly encourage your participation in the forum as a participant, listener, or both.

When will forum information, agenda, WebEx links and other materials be ready?

WebEx links to register for each session are provided above. These will be provided again on January 22, 2021 with a full agenda that includes panelist’s names, another link to this document, and the initial list of questions. We ask that you review these documents carefully, and come prepared to meaningfully engage in this process.
