Release Notes

BUG FIX (13380) – Integrator files were not uploading to the database as expected. This was fixed and deployed to the testing environment. All integrator files are being accepted as expected.

BUG FIX (13376) – Issue was found that if a license began with a zero, the system would not locate the appropriate folders to insert the data. This was updated and deployed to the testing environment. The system is now accepting all files from licensees and integrators on behalf of licenses with a zero as expected.

BUG FIX (13383) – Issue was found that an error was being thrown on update files stating that update date must be a date even if it was a date. This was fixed and deployed to the testing environment. Update files are now being accepted as expected.
