Release Notes

BUG FIX (13333) – The system was not sending error files associated with plant transfer and plant csv files for integrators uploading on behalf of a licensee. This was fixed and deployed to the test environment. The system is now sending error emails to the integrators when applicable for plant and plant transfer csv's.

BUG FIX (13172) – Whenever a poorly submitted csv file was uploaded, the system was not processing the files but also was not sending notification to the integrator or licensee that uploaded the file. This was fixed and deployed to the test environment. The system will now send a generic email to the uploader letting them know that there are errors that need to be fixed.
